

Seating / Task Chairs

# FLIGHT

---

Comfortable and easy use chair.

We now will start journey towards our new chair FLIGHT series. Flight series offers differentiated work spaces by inspiring work moving away from the standardized office designs.

---

# Design & Function

## Synchronized Tilt

The seat plate and backrest tilt independently in response to natural body movements. The tilt mechanism allows the most suitable movement for your different postures.

## W.A.T

The backrest is flexible to the weight of the user without additional control.

## Airy Back

Ventilative backrest have perspiration built on your back by effectively releasing body heat while seated.

## Ergonomic Backrest Pattern

Multiple dimension of backrest supports your back compactly by wrapping your body.

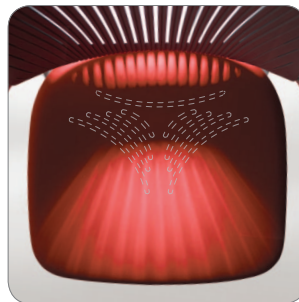

## Slim Seating Cushion

Inner shell cushion offers you comfort posture in spite of its slim and light design.

## Intuitive Lever

Projecting lever on the bottom the seat enhances easy access, visibility and excellent grip feeling.

## Inner Shell Slot Seat

Inner shell seat disperses weight through slot and work well to improve seating.

## Lumbar Support

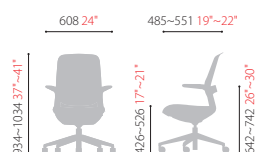

In mesh back, height adjustable lumbar support is applied to make your back comfort.
