

OFFICE SYSTEM / TASK CHAIR

# ITIS2

The restyled ITIS2 chairs feature stylish lines for a modern look. The backrest with urethane-mesh finish provides optimal support, and various adjustable settings quickly and easily make the chair conform to any body type. Ergonomics and aesthetics are both prominent aspects of this great chair.

1. Mesh, which is made of Mole and Urethane, has very soft feel as well as being elastic and durable.
2. The synchronized tilting system helps users to maintain a comfortable working posture. A locking position can be maintained at various positions from upright to declined.
3. Ergonomically designed, while supporting one's head comfortably, the headrest is height and angle adjustable according to the user's body shape and posture.
4. The ergonomic lumbar support can be easily adjusted according to the user's body shape in order to support the user's lumbar area posture in seating.
- 5.6. The position of the armrests can be easily controlled by pushing the button.
